Introducing SmartFilm for Einstein Printers

Enjoy a boost in your print reliability with new SmartFilm for Einstein.

A specialty film to be used with the Einstein material tray to alleviate separation forces during the print process. SmartFilm is a simple, intelligent Einstein add-on to upgrade your efficiency – that's easy to install.

Validated for Einstein Dental 3D Printers, SmartFilm is available as a 5-pack refill for current customers and individually included with your next material tray order.

How to Install

Put on gloves and align the SmartFilm, making sure the small notch lines up with the pour spout for proper orientation.

Insert front tabs UNDER the tray frame, gently guiding them into place.

Insert rear tabs UNDER the frame, keeping SmartFilm centered and even.

Press down around the edges to make sure SmartFilm sits flat and fully secured.

Inspect from eye level to confirm SmartFilm is flush.

Reinstall the tray into the printer and you're ready to print.
